SATHYA BARANI A N

Software Developer| AI/ML Engineer

+91 9361105525 | ansathyabarani@gmail.com |linkedin.com/sathya-barani-a-n-840899304| https://github.com/sathyanagaraj09/

SUMMARY

Software Developer with experience in developing **enterprise web applications and scalable backend systems** in financial and insurance domains. Skilled in **backend development and database design**. Strong foundation in **Data Science and Machine Learning**, with hands-on experience in **Python, NLP, and data visualization using Power BI**, enabling the development of **data-driven and analytical solutions**.

TECHNICAL SKILLS

- **Programming & Data Handling:** Python (NumPy, Pandas, OOP), SQL (Joins, Aggregations), EDA, Data Cleaning, Data Modeling
- **Machine Learning & Deep Learning:** Regression, Classification, Model Evaluation, Feature Engineering,NLP, Text Analysis
- **Web Development:** HTML, CSS, JavaScript, Bootstrap, jQuery
- **Backend Development:** PHP, Server-side Development, Database Design, Business Logic Implementation, REST API Integration, Scalable Application Modules,Java(basics)
- **Data Visualization & Analytics:** Power BI, Data Analysis, Dashboard Development, Reporting
- **Tools & Platforms:** Git, GitHub, Jupyter Notebook, Streamlit, AWS (Basic)

WORK EXPERIENCE

Infossel Soft Solutions-Coimbatore,India **July2025 – May 2026**

KEY CONTRIBUTIONS:

- **Developed** enterprise web applications for financial and insurance domains using backend technologies and SQL-based database systems..
- Designed and implemented backend modules and database architecture to support **scalable business operations** and secure data management.
- Built a **Credit Card Management System** to manage customer records across multiple services and **automate profit and expense calculations**.
- **Implemented secure** database interactions and optimized queries to improve data retrieval **performance and system efficiency**.
- Collaborated with cross-functional teams to design, develop, and maintain scalable application modules.

Major Projects

Sentiment Analysis System- Python, NLP, Machine Learning, Streamlit

- Developed a sentiment analysis model using **NLP** techniques to classify text **into positive, negative, and neutral** sentiments.
- **Performed** data preprocessing, tokenization, and feature extraction to improve model performance.
- Trained and evaluated machine learning models achieving **81**% accuracy.
- Built an interactive **Streamlit** web interface for real-time sentiment prediction.
- Demonstrated end-to-end **ML workflow** from data processing to deployment.

Insurance Management System- Backend Development, SQL, JavaScript

- **Designed** and **developed** a system to manage insurance policies, customer records, and claim details.
- Implemented database architecture and backend modules for **efficient** data storage and retrieval.
- Developed features for policy management, customer tracking, and claims processing.
- Improved operational efficiency through structured data management and **automated workflows**.
- Built **scalable modules** supporting future financial service integrations.

CERTIFICATIONS

- Advanced Programming &Master Data Science **- GUVI IIT-Madras (2024)**
- Power BI – **GUVI IIT-Madras**
- Python Programming – **GUVI IIT-Madras**
- SQL – **HackerRank**

EDUCATION

Kongu Engineering College Tamil Nadu, India

B.Sc, Software Systems |CGPA: 8.5 *(2020 – 2023)*
